Breakdown of Positive Case Percentages by Age-Groups

As our cases of COVID-19 continue to rise, data shows that the demographics of those who contract the virus hasn't changed. In fact, the demographics of the infection in this county have been fairly stable since the beginning. We continue to protect our elderly fairly well, while our younger generations are infected more often.

Lydia Mertz, MD
Elkhart County Health Officer

Percentage of Total Positive Cases by Age-Group
